Lokesh Kumar

Software Craftsperson & Full-Stack Engineer
GitHub: github.com/lokesh007-de | LinkedIn: linkedin.com/in/lokesh-kumar-4a0a15248

PROFESSIONAL PROFILE

Full-stack engineer dedicated to thoughtful software craft, deliberate system architecture, and tactile digital interfaces. Focused on building production-grade web applications with modern TypeScript, React, Node.js, Three.js, and clean engineering standards.

CORE COMPETENCIES & TECHNOLOGIES

- Frontend: React, TypeScript, Next.js, Three.js, Tailwind CSS, Lenis, Motion / Animations
- Backend & APIs: Node.js, Express, REST APIs, WebSockets, Real-Time Sync
- Systems & Engineering: Modular Component Design, State Management, Clean Architecture
- Tools & Workflow: Git, Vite, Postman, Linux, UI/UX Prototyping

FEATURED OPEN SOURCE PROJECTS

1. CollabDocs

Real-time collaborative document platform featuring live presence and markdown editing.
Stack: React, TypeScript, WebSockets, Node.js, Tailwind CSS | Repo: github.com/lokesh007-de/collabdocs

2. Salon AI Chatbot

Intelligent salon scheduling and appointment concierge with contextual natural language dialogue.
Stack: TypeScript, React, Conversational API, Tailwind CSS | Repo: github.com/lokesh007-de/salon-ai-chatbot

3. CalcPro X1

Tactile scientific and financial calculator suite featuring an AST math parser and unit conversions.
Stack: TypeScript, React, Math Engine | Repo: github.com/lokesh007-de/calcpro-x1

4. Formula Folio Luxe

High-craft luxury portfolio showcase with editorial typography and bespoke layouts.
Stack: React, Tailwind CSS, Motion | Repo: github.com/lokesh007-de/formula-folio-luxe

5. Language Translator & Periodic Table

Educational and linguistic tools with interactive atomic trends and multilingual speech translation.
Stack: TypeScript, Web Speech API, React, CSS Grid

PHILOSOPHY & CRAFT

Belief in software as an enduring architectural craft. Rejecting artificial fluff in favor of clean code, accessible user interfaces, rigorous typography, and high-performance execution.
